Encl : III

Nirma University
School of Technology, Institute of Technology
B. Tech (Instrumentation and Control Engineering)

L	T	P	C
2	0	2	3

(Open Elective for other than IC Engineering branch)

Course Code	**2ICOE51**
Course Title	**Programmable Logic Controller**

Course Learning Outcome:
At the end of the course, students will be able to -

- recognize the fundamental principles of programmable logic controller
- program PLC using standard programming techniques
- develop and design PLC based application

Syllabus	**Teaching Hours**
UNIT 1: Introduction	**03**
Definition, advantages and Importance of PLC, Evolution history of PLC, architecture and block diagram.	
UNIT 2: PLC hardware	**07**
Types of PLC, CPU unit architecture, Memory classification, Input/output devices and it's interfacing, Digital-Analog modules, Communication modules, Special function modules.	
UNIT 3 : PLC operation	**04**
Basic Ladder logic, logic functions, electrical wiring diagram, scan cycle.	
UNIT 4: PLC Ladder Programming	**08**
Programming languages for PLC, PLC module addressing, registers basics, basic relay instructions, timer-counter instructions, arithmetic functions, comparison functions, data handling, data move functions, input-output instructions, sequencer instructions, Case studies	
UNIT 5: PLC Communication protocol	**08**
Interface Standard, Modbus and Modbus plus Protocols, CC-Link overview, HART, AS-interface (AS-i), DeviceNet overview, ProfiBus PA/DP/FMS	

protocol, Foundation Fieldbus, Industrial Ethernet overview, TCP/IP overview, OPC server client

Self-Study:

The self study contents will be declared at the commencement of semester. Around 10% of the questions will be asked from self study contents.

Laboratory Work:
Laboratory work will consist of minimum 10 experiments based on the above syllabus.
