Message from the Vice President

Nirma University, since its inception, has always strived for achieving highest standards of quality in all its endeavours and has taken several initiatives in its quest for excellence. It has advanced and arrayed strong systems and processes for continuous improvement of quality research amongst faculty members. A structured scheme is also offered to the student researchers for their outstanding research achievements.

The Research activities at the University get boost from successful practices for initiating and maintaining a culture of research. The University has also been involved in collaborating as well as partnering with not only national but also international institutes of repute in order to explore greater possibilities of research. Our efforts are to make the local research strong enough to make its mark globally and translate into a tangible reality.

To emphasize the need for active research by the academia for the development of nation, it is vital that effective research on societal issues can also help in solving many burning issues of the society. The University has now put more emphasis on publications in reputed journals, patents, funded research projects and strengthening its Ph.D. programmes.

As we review on the progress of the University through the Annual Research Report 2019-2020, I would like to acknowledge the persistence and meticulousness of the researchers of the University who have made it attainable. We keep up the determination to go forward to serve the humanity at large.

Vice President,
Nirma University

Message from the Director General

Dear Reader,
Greetings!

The journey of university from enlightenment and knowledge dissemination in the eighteenth century to entrepreneurship and innovation in the twentieth and twenty first centuries has been quite interesting and eventful. The research university that took birth in Germany inspired several universities across the world, especially in the United States that today has the maximum number of research and innovation universities. India till the time of independence had only one research university – the Indian Institute of Science. Several research universities were established post-independence era. However, India needs many more research universities if she wants to be a research and innovation leader in the comity of nations.

The New Education Policy (2020) clearly states that it aims to establish India as a knowledge society and universities have a pivotal role in that. All universities are expected to engage in research and innovation. Nevertheless, the research university shall majorly engage in research and innovation, while the teaching university shall moderately focus on research and innovation. More importantly, research ought to produce outputs that are useful for the welfare of humankind. Relevance must be given top priority in the selection of research projects. Further, the universities must inculcate right values among faculty and students so that they become active researchers and develop an active mindset for innovation.

The pandemic Covid-19 demonstrates that research and innovation is the way forward for a brighter future for humankind. Although the pandemic has a diabolic impact on lives and livelihoods, nations could manage it much more effectively with the help of scientific research and innovative management. Nobody was fully sure that we would have a vaccine within a year, but it was achieved and it is likely that the pandemic shall be under control by the end of 2021. Research and innovation are opening new possibilities and creating new opportunities. Greater investment in science and technology will yield high dividends for humanity.

We at Nirma University fully realise the significance of research and innovation. Although we had humble beginnings, we have moved from strength to strength. Not only our faculty are engaged in research and innovation, our students – from the undergraduate level to doctoral level – are also active partners in this endeavour. Faculty collaborate in research endeavours at the intra-university level as well as inter-university level. Our recent intervention is the promotion of research and innovation at the undergraduate level. Various institutes have taken several steps to involve students in research and to provide a fillip to their innovative ideas.

I hope this research report provides you with information on research and innovation activities at the various institutes of the universities and also throws light on the thrust areas on which our faculty and students are working. You will also notice that papers, projects and patents are punctuated with high quality. We shall continue to invest more resources for research and innovation and contribute to the welfare of humankind that is part and parcel of our vision.

Warm regards

Anup K Singh, PhD

It was attended by 15 students. The session was divided into two halves. The first session was on ‘Creating Original Consumer Culture Theory’ between 9.30 am to 11.00 am wherein Prof.

Belk encouraged the students to create their own theories rather than relying on and empirically testing the existing theories and models. In the second session titled ‘Creating & Publishing A Conceptual Paper’ between 11.15 am to 12.45 pm, Prof. Belk shared his experience on how to work on review of literature and develop conceptual papers. Both the sessions were very informative which enhanced the knowledge level of the doctoral students. The session ended with vote of thanks to Prof. Belk by Prof. Samik Shome.

2. A workshop on “Creative Teaching” was conducted on 9th January, 2020 by Prof. Arpan Yagnik. He is an Assistant Professor of Advertising and Communication, PennState University. During the three hours short session, he very wonderfully involved all the participants in “Creative Aerobics” and explained how to make a class interesting and interactive for the students.
3. Dr. Sanjiv Vaidya is a retired Professor of Information Systems at the Indian Institute of Management, Calcutta. He interacted with the doctoral scholars on 21st January, 2020 regarding their progress in research work and guided them based on his profound academic experience.
