Subject: AIMS Award Announcement: A19-054 & A19-137
To: <vijay.kothari@nirmauni.ac.in>

Hi Dr. Kothari,

I have some great news! Our team has reviewed your applications, and I am delighted to inform you that your projects have been selected for our AIMS Awards program.

Your projects have been assigned the following Project IDs: A19-054 and A19-137. Going forward, we will refer to your project on LasR as A19-054, and your project on Nitric Oxide Reductase (NOR) as A19-137.

With each AIMS Award, you will receive:

- a customized small molecule virtual screen using Atomwise's AI technology,
- ~72 compounds predicted to bind to your specific target protein - shipped to you ready for testing, and
- support from Atomwise's medicinal and computational chemists.

You can expect to hear from the scientist(s) assigned to your projects in the next few months to discuss customized research plans for each of your projects. Once the research plans are finalized, we will work with you and your institution's tech transfer office (TTO) on a research agreement for each project before we perform the virtual screen.

In the meantime, please don't hesitate to reach out if you have questions! We are very excited to be working with you, and best wishes for your research!

Please note: Your projects are still under consideration for our Premier Awards (i.e. RaD Discovery Award, C4C Discovery Award, and Innovator Award). Announcements about the Premier Awards will be made next month.

Best,
Tessa
