About the Workshop

Intellectual Property (IP) refers to creations of an individual's mind, such as, scientific and other inventions; software; fictional and artistic works; designs; symbols; names; logos etc. IP is protected under law by patents, copyright, trademarks etc. which empowers an inventor to earn recognition and / or financial benefit from what he has invented or created. The makeover of world through art, literature and scientific innovations has led to an explosion of content which needs to be legally preserved and protected by its inventor. The IP rights aims to strike the right balance between the interests of inventors and the public interest to nurture an environment in which creativity and innovation can flourish. This workshop introduces to basics of IP rights and methods to protect them.

Programme Contents

- Introduction and Significance of IP
- Copyright and its Significance
- Introduction to Patents and its filing
- Introduction to Patent Drafting
- Best practices in National and International Patent Filing

The sessions will include learning through case studies, participation by discussion etc. and the experience sharing.

Resource Persons

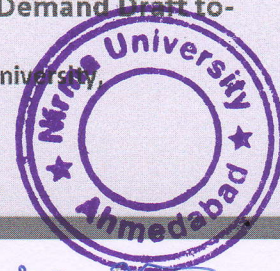

The workshop will be conducted by experts who have garnered an extensive experience and are enriched with training in Intellectual Property Rights.

Expected Outcomes from the Workshop

- Researchers and faculty members from Universities will be able to protect their ideas, experimental processes, content and other Intellectual Properties
- Scientists, entrepreneurs and industry professionals will be able to protect their product design, brand, and Research & Development time and money investment
