Hi Priyanka,

**You have now officially been granted NVIDIA DLI University Ambassadorship.** DLI Ambassadors are a select group of DLI Certified Instructors committed to teach DLI instructor-led workshops and meetups at universities, academic conferences, and events at no cost exclusively for academic students, staff, and researchers. The following is a basic list of the benefits and Ambassador contributions of the program.

### Ambassador Benefits:

- Free DLI Instructor Certification (USD\$1000 value)
- Ability to bring free, world-class DL training to your academic community using proven DLI cloud-based training platform and lecture materials (avg. USD\$2000 compute value per workshop)
- Formal badge recognition for DLI University Ambassador status
- Reimbursement for catering and travel expenses up to USD\$500 per hosted DLI event (reimbursement requests submitted with receipts). If you plan to claim reimbursement, please fill out the attached wire form and return to Chandra Cheij, cc'd here.
- Access to the [DLI Ambassador Event Kit](#) for best practices guides, instructor badges, "Train-the-Trainer" assets, event promotion assets, and workshop slide deck content
- Early access to new [DLI Teaching Kits](#) and free cloud-based GPU platforms for students in curriculum courses

### Ambassador Contributions (in the next 12 months):

- Host/teach at least any combination of two of the following events per 12-month period (including submitting proposals for conferences if necessary) following Ambassador award date (Ambassador workshops can be given in a variety of settings and universities including curriculum courses, lab seminars, conference tutorials, etc.):
  - Full-day DLI workshop
  - Half-day DLI workshop or session (min. 2 hours)
- Recruit your own TAs for DLI workshops, one for every 20 attendees after the first 20
- Help promote Ambassador events via email, university web site, in classrooms, at conferences, etc. using DLI Ambassador Event Kit
- Manage DLI event attendee registrations ensuring only academics are admitted (i.e. through Eventbrite using provided template in Event Kit)

As we are in early stages of the DLI University Ambassador Program, some of the above benefits and contributions are subject to change. The latest information will always be found [here](#).

**Thanks and congratulations again, we look forward to working with you to organize your first Ambassador Workshop! The first step to organizing your workshop is to fill out the Ambassador Workshop Request [form](#). If there are any questions, please let us know.**

Kind Regards,

Joe Bungo

**Subject:** DLI Certified Instructor Application Status

Hello Priyanka,

Congratulations! After reviewing your Deep Learning Institute (DLI) Certified Instructor application we are certifying you to teach Fundamentals of Computer Vision (CV) 2.0, Fundamentals of Multiple Data Types (MDT) and Fundamentals of Accelerated Computing with CUDA C/C++.

Unfortunately we are unable to certify you on Fundamentals of Natural Language Processing(NLP). We encourage you to reapply after you have spent a little more time with the course material.

You have already completed the DLI Platform Training course so you are ready to start teaching the courses you are certified on. My colleague, Joe Bungo, will be in touch with you about our Ambassador program. I have included a snippet from a past newsletter that Adam Tetelman sent out with some additional information on accessing help when delivering workshops.

NOTE: Slides can be accessed by clicking the link below:

FROM: Adam Tetelman

Hello Deep Learning Institute Partners and Certified Instructors,

This is a general email to update you on DLI processes and inform you about recent changes.

...

**Event Support Channel:**

We have created a new support mailing list for issues escalation during DLI workshop. If you are running a DLI workshop and experience any major issues with the content or access to the platform, please send an email to [dli-support@nvidia.com](mailto:dli-support@nvidia.com). [Please use [dli-help@nvidia.com](mailto:dli-help@nvidia.com) if you have content questions leading up to a delivery.] Please be sure to include details relevant to the problem you are facing, the location/name of your workshop, the number of students impacted, and the impact on the workshop. You should expect to see an immediate response.

**DLI Slide Access:**

We have recently moved all DLI slides to a [shared Google Drive directory](#) (copy and paste the hyperlink into your browser as clicking this link directly sometimes does not work). Please reach out to [@Adam Tetelman](#) if you do not have access, as these slides should be used for all DLI workshops. As a reminder, please do not make any updates to these slides (except for name/date updates).

...

Thank you for making the NVIDIA Deep Learning Institute an exquisite training experience.

Thanks,

Nayna J. Malaviya
