Feedback on Course and Curriculum	Preparation of Syllabus should be done with a view of providing the latest forms of contracts. In the business society you never know what the other party is thinking or planning, it may be most of the time good but sometimes you can't avoid people who will try and trick you for their advantage so in this case the contract law plays a very important part of protecting you and making sure that the promises will be kept. Applied aspects of contract law should be emphasized.
