NATIONAL PUBLIC HEALTH LAW: INDIA'S NEED TO FILL THE LEGAL LACUNAE OF THE ARCHAIC EPIDEMIC DISEASES ACT, 1897

INTERNATIONAL JOURNAL OF LAW MANAGEMENT AND HUMANITIES (VOLUME 6, ISSN (O): 2581-5369)

By - Prabhav Tripathi & Teesha Gupta

This paper analyzes the flaws in the Epidemic Diseases Act and establishes why this more than a century-old blunt health law is not in consonance with the contemporary needs of the nation. It seeks to discuss potential health challenges against which India does not have the necessary legal mechanisms in place and how the draft of Public Health (Prevention, Control and Management of Epidemics, Bio-terrorism and Disasters) Act, 2017 exhibits the potential to counter them. Further, this article examines the proposed structure of the new law, tests its constitutional validity, analyzes previous national health policies and laws, and discusses international covenants that focus on global cooperation via rights-based approach in Public Health Law.
