STUDY OF ANTHROPOMETRTY

SITE DEVELOPMENT AT CHHARODI LAKE
SG HIGHWAY

2021-2022

21BAR012 NIRMA
Ishika Choksi UNIVERSITY
IAPNU

The cafe designing and site development was like an opportunity for me to explore the various aspects of public perspective and incorporate that into designing and how the cafe designing would also affect or hinder the type of seating arrangements and aura of the place in it's particular environment. The cafe through my vision has a light hearted atmosphere with a serene and tranquil ambience creating a calm and cozy rendezvous place serving the visitors as a good vantage point giving the view of the charrodi lake and also comprehending the play of levels.The site development also involved the consideration of other public recreational activities and sites of interest to the visitors while also contemplating the context around.
