

Urban Resilience and Adaptation for India and Mongolia

Curricula, capacity, ICT and stakeholder collaboration to support green & blue infrastructure and nature-based solution

Program: Bachelors in Architecture
Level: Semester VIII

Duration: 15 Weeks
Course
Credits: 8 ECTS

Urban Context Studio

(Revised Course)

The studio is formulated to explore the interface between Architecture and Urban Design. Urban processes have been introduced through a study of a precinct that has a variety of features (Natural and man-made); aspects of urbanity to arrive at concerns, issues and most importantly vision and ideas. These aspects are analyzed, adapted and adopted to integrate the building into its context. The understanding of urban context is then further demonstrated through form and architectural language.

The objectives set for the studio course are –

- To establish a relationship of the proposed project in the urban context
- To analyze character, abstraction and design development
- To prepare a master plan and conceptual architectural design

‘Urban Context Studio’ in compliance with the course objective further aims at incorporating a set of values that not only refers to immediate but the wider context into the design of building or buildings. Thus, an attempt here is to deal with architectural projects that respond to urban conditions, to arrive at an appropriate design program, scale and language.
