3.2.2 Scheme to Promote Research and Innovation amongst the Students

Objectives

The Mission statement of Nirma University emphasises on all round development of its students. It is accomplished through various means, including the curriculum, skill building trainings and workshops, encouraging student participation in extra and co-curricular activities, etc. Apart from these, it is also necessary to promote the activities of research and innovation amongst the students. In fact, student research is considered as an integral part of a learner-centered institution. Further, it is proved that the involvement of students in research activities enhances their classroom learning, instigate them to independent thinking and boost their confidence.

The research at UG and PG level is also emphasised in the Research Policy of Nirma University. Accordingly, the university and its constituent institutes encourage student research by formal and informal ways. The consistent student performance in prestigious technical competitions like, Robocon, SAE BAJA, Mitsubishi Electric Cup, Moot Court Competitions, Business Idea Competition is the evidence of efforts in encouraging students for research and innovation.

Structure to Promote Research and Innovation amongst the Students

At present, the students enrolled under the university can be divided into three categories: (i) the PhD scholars. (ii) the PG students, and (iii) the UG students. Students at all the three levels are encouraged for the activities of research and innovation.

At PhD level, the scholars are carrying out their research work on focused areas under designated Research Supervisors/Guides with the overall supervision of the Dean – Faculty of Doctoral Studies and Research. The research activities at this level need to be scaled up with more emphasis on quality research outcomes in form of publications, prototypes, patents, etc.

At Postgraduate level, the research activities are promoted and monitored by the concerned HoI, HoD/Area Chair and Programme Coordinators. These activities need to be strengthened by way of more academic rigour, advanced level courses, improving the lab facilities, emphasising on the quality of the thesis, encouraging students for publishing in peer reviewed journals, etc.

It is felt that more intensive efforts are required to encourage the UG students to participate in the research activities. The students need to be motivated to participate in Idea Lab activities, project based/experiential learning, internship with premier institutes/research organisations/industries, preparation for career in research, organising events of research, etc.

Ways to Promote Research and Innovation amongst the Students

In general, there are two ways of promoting research and innovation amongst the students, i.e. Formal and Informal ways. The formal ways include:

- i) Through Curriculum, Courses
- ii) Project Based Learning/Experiential Learning Approach
- iii) Structured Internship, Industrial Training, Field Trips, etc.
- iv) Research Training Programmes, Research Methodology, Paper Writing workshops
- v) Provision of Scholarship/Stipend for PG, PhD and Post-Doctoral Fellow

Apart from the formals ways, there are many other ways by which the Research and Innovation can be promoted amongst the students. These include:

i) Creating a Blog of Ideas

It is known that the young minds are very creative and full of enthusiasm. They have many innovative ideas, but due to non-availability of suitable platform, the ideas cannot be implemented. Sometimes, for a single innovative idea, there can be multiple approaches to convert it into product/prototype. Such multiple approaches can be inter-disciplinary in nature and may come from the students of different disciplines. For this, it is necessary to

have a Blog of the students' ideas and access to such Blog may be given to all the students and faculty members of Nirma University. With this background, it is proposed to have a mechanism of collecting students' ideas and sharing it on a common platform. This activity may be further augmented by having competition of best ideas, encouraging students of different discipline/institute to work on these ideas, providing funding to the selected ideas through Idea Lab, etc.

ii) Through Idea Lab Projects

An Idea Lab is functional at Institute of Technology. The main objective of the Idea Lab is to motivate students to think, conceptualise and realise their ideas. It provides an opportunity to the students to validate their ideas through guided research. The Idea Lab boosts confidence of the students and also encourages them to publish and patent their research work. In last five years, many projects have been funded by the University under the Idea Lab.

Looking to the success of the Idea Lab concept, it is proposed to have such Idea Labs in each constituent institute of the University. The necessary budget should be allocated to each institute for Idea Lab. The Institute should evolve a structured mechanism for (a) Awareness of Idea Lab amongst the students, (b) Calendar for inviting proposals under the Idea lab, (c) Mechanism for allotment of Fund, (d) Strategy for monitoring the progress of Idea Lab projects, (e) Compilation of the outcomes of the Idea Lab projects in form of a booklet, (f) Mechanism of showcasing the Idea Lab projects through exhibition/social media/website/newspaper, etc.

iii) Providing Platform to Showcase Research Outcomes/Research Skills

For promotion of research amongst the students, it is also necessary to provide them platform to showcase their research skills and research outcome. This will also motivate other students to involve themselves to different activities of research and innovation. For showcasing research talent and the research outcomes, the University and constituent institutes should organise technical festivals, events, seminars, workshops and dedicated student conferences on regular basis. In fact, the best project/design/model competition (for final year UG and PG), paper/poster/business idea presentation, moot court competition, doctoral student conference should become the integral part of the annual academic calendar.

These can be strengthened by way of preparing annual calendar of such events, deciding themes, involving students in organising committee, ensuring maximum student (UG, PG and Ph.D.) participation, proper documentation of the events and the outcomes, budget provision, etc.

iv) Encouraging the Students to Participate in Competitions/Conferences organised by the Leading Industries/Institutes/Universities/Organisations

The University students are participating in different competitions/events organised by industries, professional bodies, institutes, etc and bringing many laurels. Considering these, it

will be appropriate to formalise this by way of identifying such national/international events, providing necessary mentoring, R & D facilities and support to the students, encouragement by way of awards and incentives, setting up system of peer to peer learning, providing academic support, necessary budget provision in the annual budget, etc.

v) Encouraging the Students to Apply for the Government R&D Schemes, Research Awards, Membership of Professional Organisations, etc.

There are many R & D funding schemes available from the Government of India, like INSPIRE, Young Scientist Scheme, Women Scientist Scheme, Prime Minister Scholarship Scheme, Visvesvaraya PhD Scheme, Schemes from the INSA, etc. There are Travel Grants also available to attend International conferences. Apart from these, very prestigious international funding schemes available for the students, including the Fulbright Scholarship, DAAD scholarship, etc. The Institutes should motivate the students to take benefits of such schemes. The students should also be encouraged to apply for the travel grants, prestigious research awards, take the memberships of professional national and international bodies, etc.

vi) Through Student Associations

The student associations are very active across the University. Theme based seminars, exclusive student conferences, research orientation programmes may also be organised with the support of industry, R&D Organisations, NGOs and government funding agencies through the Student Associations.

vii) Leveraging the Alumni Support for Promotion of Student Research

Nirma University Alumni are spread across the country and has a strong industry reach. Many of its alumni members are in top-level positions in reputed private and public sector as well as R & D organisations. A considerable number of alumni have successful overseas career also. The senior alumni should be invited to share their experiences with the existing students through guest lectures, seminars, conferences, workshops, etc. They should also be invited as mentors for the student projects, internship, incubates, etc. The Alumni Associations may constitute awards, travel grants, etc for the outstanding student researchers.

viii) Encouraging the Students' Innovation

Young minds are very creative and they should be encouraged to make innovations by using the principles of science, technology and other means. These innovations may include new ideas, development of gadgets/products, software application, better version of the existing system, new strategy, new model, better technique or enhanced process that result into improving the quality of life, societal benefit, social welfare, etc. It is proposed to encourage the students' innovation by way of organising a competition of students' innovations. Such competition can be a yearly event, where students make presentation of their innovations before a jury. Based on the novelty of innovation and its application for the societal benefits,

three prizes/awards may be declared. The winners should be felicitated by mementos and Certificates of Appreciation.

Ways to Promote Research and Innovation amongst the Students

The following ways are to be considered for the students participating/preparing for the prestigious national/international technical/professional competitions:

[A] Academic Support and Leave Consideration

- i) The students participating in important state/national/international events (research related events) will be given flexibility in submission of Term Assignments, Laboratory Work, etc. Such students may be considered for re-tests under different Continuous Evaluation (CE) components.

- iv) If the leave requirement is more than 10 days for the preparation, the matter will be considered as a special case. Based on the recommendations by the Faculty Mentor, concerned Head/Area Chair and the HoI, the Appeal Committee may condone the leave.

[B] Financial Support

For the prestigious State/National/International technical/professional competitions, research events, the Institute may provide financial support in terms of purchase of equipment, software, chemical, consumables, books/journals, travel and stay etc. For all such expenses, necessary budget provision is to be made by the concerned Department/Institute for each financial year. The approval for such budget is to be obtained from the Director General.

The food, accommodation and travel expenses will be reimbursed for the participants of the competitions as per the University Policy.

Note: The benefit of above (Leave Consideration and Financial Assistance) will only be given for the prestigious state/national/international competitions, events, etc based on the level of the event, nature of competition, credentials of the organisers, benefits to the participants and the Institute / University, etc.

[C] Travel Grant for Attending International Conference to the UG and PG Students

The University has framed guidelines for granting financial aids to the full-time PhD students for attending International seminar/conference. On the similar line, partial financial aid should be given to the UG and PG students for attending and presenting their research outcomes at the prestigious international conferences, provided that the student has received

partial financial support from the external agencies. The norms for awarding such financial aids, the procedure for application and approval will remain same as that of the guidelines for granting financial aids to the full-time PhD students.

3.3 Undergraduate Research Policy

1. Preamble

Research and Innovation are the keys for growth of the society and mankind. Looking at the concepts differently, reviewing methods in use and interpreting the existing knowledge helps to go beyond the mundane approaches. Besides, the university aims to promote excellence, nurture talent, enable students to recognise their potential and ensure that they receive the best preparation. The research at the undergraduate level shall help build the research ability of the students for their career progression in the corporate world and/or in their chosen field of higher studies. To drive the research aptitude and to actively engage interested undergraduate students in realistic, relevant and socially-relevant problem solving, this policy document shall act as a guideline.

2. Context

Research at the undergraduate level can become a habit if it is nurtured and groomed at the freshman level. Developing the process of thinking, honing critical thinking skills, enthusing inquisitiveness, supporting the translation of ideas and providing the right mentoring at each stage can transform students at the undergrad level. These students with changed outlook can create research transformation at the university, in research labs and/or during higher studies. The majority of the university students are undergraduates and a few inclined ones if provided with the right environment, can be the teammates of postgraduate and PhD scholars. They can be the motivated ones who can publish research, participate in conferences, patent the translated ideas and increase visibility.

3. Objectives

This undergraduate research policy at the university level is framed with the following objectives:

- To inculcate the spirit of research, student learning in team, and work on ideas.
- To increase research publications through the systematic efforts of undergraduate students independently and in collaboration with senior postgraduate and PhD scholars.
- To support teams consisting of Undergraduate, Postgraduate and PhD students across institutes/disciplines leading to meaningful outcome and a handholding system.
- To plan and execute workshops, events, talk shows, presentations, competitions, formal interactions with researchers etc. to help interested undergraduate students understand the nuances of research, develop attitude and skills for research, to understand the problem and write the correct problem definition/problem statement.
- To identify the right faculty mentor(s) across the university to support interdisciplinary groups and to act as the bridge for networking across disciplines.

- To nurture the ideas through support under the Idea lab/Tinkerers' lab/ student start-up and incubation/funded research projects.
- To develop and monitor an IT-enabled system/forum to post problem statements across disciplines.
- To promote students to compete in the state, national and international events organised by reputed institutions/organisations/forums and Government ministries.

4. Undergraduate Student Research Cell at Each Institute/School

Each discipline has a specific way of observing, identifying and solving problems in the respective domains. At the same time, there may be a possibility to apply the solutions available in the other domains. To groom the students in their field and to meet the experts in the other domains, a bridge is required and that can be established through the institute/school level Undergraduate Student Research Cell.

The structure of the cell will be as follows:

- Chairperson - Head of the Institute/School
- A faculty in-charge of the research cell at the respective institute/school
- A faculty from each department/area to act as the nodal person for the students (department coordinator)
- UG Student representatives from each department (1 from 3rd year per department/area) and/or PG/PhD scholars from each department, wherever applicable.
- Representative of Dean - Research, Nirma University

5. Roles and Responsibilities

- i. Head, Research (Faculty in-charge) shall be responsible for coordination among the departments across the school/institute and reporting to the Director of the respective school. He/she shall be meeting the in-charges across the institutes for discussions on problems identified.

- vii. It is desired that three activities are done by each department and in turn at least 8 activities per school/institute. To begin with about 5% to 10% of the student population is covered under Undergraduate Student Research Cell.

6. Proposed Activities under Undergraduate Student Research Cell

The undergraduate students research cell shall function to promote student-level discussions at the peer level, a PG-UG handholding and guidance by a PhD scholar and a faculty mentor. It shall conduct the following activities for interested students:

- i. Theme-based workshops e.g., Research methodology, literature survey, research paper writing, problem identification, time management and planning, the art of poster making and presentation etc.
- ii. Sessions on research tools like LaTeX, reference management software, statistical analysis and representation, flowchart making/drawing software, grammar tools, presentation tools, etc.

xii. Identifying research-based projects at UG final semester under Major Project.

7. Focus of Undergraduate Major Projects as a Part of Student Research Cell

The university/institute involves students in research through multiple activities including offering UG-level major project/internship. Some of the students, well-groomed for research can bring a lot of ideas usually not thought of. This brings a possibility to make the undergraduate-level major project a great opportunity for students to mould themselves.

The final year UG major project may not be only academic research but a translational one. It is suggested that the students are provided with the research project titles from industries as well as by the faculty and they work on these leading to a meaningful outcome in terms of job/patent or research papers.

Suggestions for the Department Student Research Cell:

- i. Invite research problem statement(s) from relevant industries in the domain.
- ii. Invite project abstracts from the faculty members' research domain.
- iii. Define the required infrastructure and plan the same. Possibly infrastructure of industry and institute together may be helpful and hence a meeting with industry guide is advised.
- iv. The targeted outcome and the timeframe may help to devise a strategy to involve students from different years and carry work forward in a stepped manner.
- v. Plan for the budget if equipment and components are required from the industry or the institute. If the facility created over the period is likely to help future students, the department may consider the budget in a phased manner over years.

Suggestions for the university/institute /school:

- i. Create an ecosystem, e.g. institute research board, research park, Central Instrumentation Centre.
- ii. Plan for infrastructure for research i.e. identify research space, extended library hours, and regularly upgraded infrastructure and equipment.
- iii. Industry support.
- iv. Faculty support, mentoring.

8. Modality and Review

- i. Meeting of the department coordinator with the department Student Research Cell students shall happen once a month and the meeting of department coordinators with the faculty in-charge at the school/institute level shall be once in three months.

- ii. Meeting of the department coordinator with students shall focus on students' expectations, problems in identifying the right mentor(s), support for tools, and planning of events based on students' inputs and requirements.
- iii. Meeting of department coordinators with faculty in-charge at school shall focus on activities to be planned, and their execution, identifying the needs of students across the disciplines, facilitating to manage the inter-disciplinary resources, inter-school and inter-institute challenges.
- iv. A review of institute/school level Undergraduate Student Research Cell activities shall be done by the Head of the Institute and representative of Dean - Research, Nirma University once in six months. This may be an agenda item of institute-level research committee meeting/s.

9. Promotion of Undergraduate Research Cell at the Institute Level

Developing a research culture among undergraduate students and promoting it for the societal good is an important task. The young talent has a lot of ideas, and often needs to be backed by a scientific and logical base. This age group if guided correctly, can lead to a good number of publications, patents and incubations. The cell shall put all the efforts, not limited to the following:

- Regular awareness sessions and posters.
- Sharing research problems/topics across disciplines within the institute and across the institutes through website.
- Inviting stalwarts to share their life/success stories, sharing inspirational biographies,
- Promoting the success of UG students through institute's website and social media platforms.
- Involving UG students from Semester II onwards in the activities like idea lab and funded projects.
- Informing students of activities happening around us and over the internet.

10. Budget and Resource Utilisation

The institute/school shall prepare the annual plan of the tentative activities and accordingly the budget requirements for every financial year. The honorarium and logistic expenses for the external and internal experts shall be in line with Nirma University norms as prescribed from time to time. For all major activities, the approval of the respective Director/Director General will be required as per the regular practice/s. The budget specifically marked for the cell can be used for the following, but not limited to:

- Hosting national/state/institute-level research promotion activities.
