19 | Flo

All these ceramic surfaces are perfect to paint on with alcohol ink. One can use the tiles as coasters or simply display as art or can be used for gifting purposes. Besides tiles, one can also decorate dishes with Alcohol Inks – from plates, cups to vases everything is possible.

To make the Alcohol Inks stick better, place the painted porcelain in the oven at 150 ° for about half an hour.

The procedure here is the same as on Yupo paper, but the challenge lies mostly in the round shapes – here the colors sometimes run unexpectedly. Another possibility is the application of alcohol inks with an airbrush gun. This way a very specific application is possible and is used for realistic pictures.

2 Hand washing is recommended instad of using a dishwater.
