Fertezy

A Smart Compost Machine

Turner for mixing the shredded content

Shredder for churning the organic waste into fine texture

A smart device to convert residual organic waste into mature compost which nourishes the soil through the process of aerobic decomposition.

Ideations

All the internal functions can be customized as per the requirement of the user from setting date and time, to the quantity of microbes (buttermilk) to be sprayed. It can be automated as well as manually handled.

Interface

The product is application based, making the process time saving and effortless

All the internal functions can be customized as per the requirement of the user

The shredders can be controlled through the app and helps in churning the organic waste into fine texture for further process

The app will notify the user about the completion of the process
