[The Simulated Client: A Method for Studying Professionals Working with Clients](#)

Author: Fran Wasoff, R. Emerson Dobash

Publisher: Routledge, 2020

ISBN: 9780815347330

Published in 1996, this book presents an innovative method for studying the work of professionals with clients that was applied to an evaluation study of legislation and of lawyers working with clients seeking a divorce. With the simulated client methods, the researcher plays the role of simulated or hypothetical clients with predetermined characteristics who are consulting a lawyer, the research subject. The research is carried out in the natural setting of the lawyer's office and the lawyer conducts business as usual. The method overcomes problems of access due to client confidentiality that are commonly found in research of professional groups. It is a qualitative but focused method for evaluation research which has strengths for making comparisons across professional practice. The book will be useful to those conducting research on professionals and other elite groups working with clients as well as those interested in the socio-legal study of legal professionals. [Youth, Community and the Struggle for Social Justice](#)

Author: Tim Goddard

Publisher: Routledge, 2020

ISBN: 9780367228132

Activists, policymakers, and scholars in the US have called for policy reform and evidence-based efforts to decrease the number of people in jail and prison, improve hostile police–community relations, and rollback the "tough on crime" movement. Given that poor people, particularly poor people of color, make up the majority of those under carceral control in Western, industrial countries, can technical solutions, gradual reforms, and individual-level programming genuinely change the deeply entrenched carceral state that has been expanding in the US for over 40 years? [Respectable Citizens - Shady Practices: The Economic Morality of the Middle Classes](#)

Author: Stephen Farrall

Publisher: Oxford University Press, 2020

ISBN: 9780199595037

Respectable Citizens - Shady Practices seeks to explore a previously neglected aspect of crime in modern society - namely those crimes that are committed by otherwise 'respectable' citizens in the market arena. The book delves into the 'grey zone' where illegal, unfair, unethical, and 'shady' practices coalesce: from the retailers who see themselves as victims of customers who take unfair and often illegal advantage of generous offers, to the consumers sold 'useless' insurance and financial packages and 'defrauded' by 'small print' clauses. The authors outline the contours of the contemporary moral economy, driven and shaped by technological innovation as much as new economic policies, and ask, is a 'predatory society' emerging from the central sphere of consumption? [Respect and Criminal Justice](#)

Author: Gabrielle Watson

Publisher: Oxford University Press, 2020

ISBN: 9780198833345

Respect and Criminal Justice offers the first sustained examination of 'respect' in criminal justice in England and Wales, where the value is elusive but of persisting significance. The book takes the form of a critique of the 'respect deficit' in policing and imprisonment. It is especially concerned with the ways in which both institutions are merely constrained and not characterized by respect. In the course of the critique, it emerges that they appeal to the word 'respect' but rarely and only superficially address the prior question of what it is to respect and be respected. Despite academic interest in the democratic design of these institutions in recent decades, the book concludes that respect is more akin to a slogan than a foundational value of criminal justice practice. Author: Benjamin Hardy Jr.

ISBN: 978-0593328965

In *Personality Isn't Permanent*, Dr. Benjamin Hardy draws on psychological research to demolish the popular misconception that personality—a person's consistent attitudes and behaviors—is innate and unchanging. He offers practical, science-based advice to for personal-reinvention, including:

- Why personality tests such as Myers-Briggs and Enneagram are not only psychologically destructive but are no more scientific than horoscopes
- Why you should never be the "former" anything--because defining yourself by your past successes is just as damaging to growth as being haunted by past failures
- How to design your current identity based on your desired future self and make decisions here-and-now through your new identity
- How to reframe traumatic and painful experiences into a fresh narrative supporting your future success
- How to become confident enough to define your own life's purpose
- How to create a network of "empathetic witnesses" who actively encourage you through the highs and lows of extreme growth
- How to enhance your subconscious to overcome addictions and limiting patterns
- How redesign your environment to pull you toward your future, rather than keep you stuck in the past
