### Course Learning Outcomes (CLO):

At the end of the course, students will be able to –

1. relate to the work culture at the engineering workplace
2. develop competencies necessary for professional career
3. value interpersonal and human relationship skills
4. build the foundation for industrial internship / major project

### Syllabus:

The summer internship is aimed at providing opportunity to the students to gain practical experience in the industries / academic and research institutes for a period of 2-3 weeks during summer break between Semester-II and Semester-III. During the summer internship the student will have the exposure to industrial / research environment which will help them to develop the competencies required for professional career, inter-personal and human relationship skills.
