### Course Learning Outcomes (CLOs):

At the end of the course, the students will be able to –

1. develop analytical approach and/or experimental program to solve identified problem (BL3)
2. choose appropriate solution for the identified problem. (BL5)
3. build report and present before peers. (BL6)

### Syllabus

Students will be assigned one topic related to any field of construction technology and management. They will carry out their project in-house or at industry under the guidance of faculty. The progress of student will be monitored continuously. Evaluation of the major project II shall be in the form of project presentation at the end of the semester.
