Course Learning Outcomes (CLOs):

At the end of the course, the student will be able to –

1. appraise the concerns of community for enhancing its living standards (BL5)
2. build contacts with the community to learn its concerns (BL3)
3. justify the involvement of citizens for community development (BL5)
4. apply the technological developments for solving the community issues (BL3)
5. recommend the feasible solutions for societal issues. (BL5)

At the end of the second semester and during break between semester II and III, the students are required to undergo a community service internship of 03 credits by volunteering at NGOs / Civil Society Organisations for 2-3 weeks as a field work and time duration equivalent to one week is to be spent for report writing. Through community service internship, the students are sensitized to social issues. They work closely on important societal issues, contribute to society and sharpen their social skills.
