-	-	-	-	-	-	<b>3</b>

### Course Learning Outcomes (CLOs):

After successful completion of the course, the students will be able to –

1. appraise the concerns of community for enhancement of standard of living of the community
2. survey the community to learn its concerns
3. justify the involvement of citizens for community development
4. apply the technological developments for solving the community issues
5. propose the feasible solutions for societal issues

At the end of the second semester, during the summer break, the students are required to undergo a Community Internship of 03 credits by volunteering at NGOs / Civil Society Organisations for 2-3 weeks as field work and one week for report writing. Through community internships, the students are sensitized to social issues. They work closely on important societal issues and contribute to society and sharpen their social skills.
