CoE in Data Science  
Data Science Club**

**Executive Summary**

| <b>Sr. No .</b> | <b>Date</b> | <b>Name of the event</b>                                             | <b>Information</b>                                                                                                                                                                                                                                                     | <b>No. of Participants</b> | <b>Level Institute / State / National/ International Level</b> | <b>Type of event Technical /Non-technical</b> |
|-----------------|-------------|----------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|----------------------------------------------------------------|-----------------------------------------------|
| 1.              | 01/10/2024  | Kaggle Contest                                                       | The event provided students with a fun and competitive platform to enhance their data science skills. First and second-year students participated in offline challenges to explore the field, while third and fourth year students tackled real-world problems online. | 40+                        | Institute                                                      | Technical                                     |
| 2.              | 15/10/2024  | EDA Workshop                                                         | The workshop titled "Unlocking Financial Insights" was organized to provide students with an in depth understanding of Exploratory Data Analysis (EDA) in the context of financial datasets.                                                                           | 33                         | Institute                                                      | Technical                                     |
| 3.              | 23/10/2024  | ML Model Development to Deployment Using Google Cloud Platform (GCP) | The workshop aimed to bridge the gap between theoretical knowledge and practical application, focusing on deploying ML models using Google Cloud Platform (GCP).                                                                                                       | 120+                       | Institute                                                      | Technical                                     |
| 4.              | 08/09/2025  | Introduction to Data Science                                         | The session focused on providing a clear roadmap, essential skills, learning resources, and career perspectives for students aspiring to build a foundation in Data Science.                                                                                           | 100+                       | Institute                                                      | Technical                                     |
| 5.              | 12/09/2025  | Learning by Doing: A Practical Workshop on                           | The workshop focused on demonstrating how modern AI tools can be effectively leveraged for productivity,                                                                                                                                                               | 90                         | Institute                                                      | Technical                                     |

|    |                          |                                            |                                                                                                                                                                                                                                   |     |           |           |
|----|--------------------------|--------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|-----------|
|    |                          | AI Tools                                   | learning, creativity, and project development.                                                                                                                                                                                    |     |           |           |
| 6. | 02/01/2026               | Bi-weekly Kaggle Contents                  | The session aimed to teach the attendees basics of Kaggle and Kaggle API, providing them the necessary knowledge to participate in the said Kaggle contest series.                                                                | 50+ | Institute | Technical |
| 7. | 21/01/2026 to 22/01/2026 | End-to-End ML: From Building to Deployment | The workshop focused on bridging the gap between theoretical understanding and real-world implementation by guiding participants through model development, evaluation, and cloud-based deployment using industry-relevant tools. | 40+ | Institute | Technical |
