

A delegation from Germany

A delegation from the Technical University of Applied Sciences Würzburg-Schweinfurt, Germany, visited civil engineering department, IT-NU on March 21, 2025. The delegation consists of 19 members, including 12 civil engineering students from the 6th term. The visit was a great opportunity for academic exchange and collaboration.

Workshop under the SPARC-UKIERI project funded by the British Council

The Civil Engineering Department, Nirma University, hosted a research capacity-building workshop under the SPARC-UKIERI project, funded by the British Council and the Ministry of Education, Govt. of India. The initiative involves leading institutions from India and the UK, including IIT Mandi, Nirma University, SVNIT Surat, and universities from the UK such as Reading, LSBU, UCL, and Northumbria. The workshop, held from 6–15 January 2025, included sessions at Nirma University, site visits, and concluding sessions at SVNIT Surat.

Dignitaries from Adani Solar and Nirma University

Institute of Technology, Nirma University, and Adani Solar have signed a Memorandum of Understanding (MoU) focused on training and development on 29th May 2024. Under this MoU, Nirma University will provide specialized training to the Graduate Engineer Trainees (GETs) of Adani Solar.

This collaboration aims to enhance the technical and professional skills of the GETs, equipping them with the advanced knowledge and practical expertise required in the solar energy sector. The partnership signifies a strong industry-academia linkage, fostering a bridge between theoretical learning and real-world application. By leveraging Nirma University's academic resources and Adani Solar's industry experience, this initiative is expected to produce well-rounded professionals who can contribute effectively to the renewable energy industry.

The MoU was signed by Mr Anil Dixit, Head HR at Adani Solar, and Dr R N Patel, Director, School of Engineering, Nirma University. This MoU not only benefits the trainees but also strengthens the relationship between the two institutions, promoting innovation and excellence in the field of solar energy.

MoUs

An MoU was signed between Nirma University and Global Water Innovation Centre for Action (GWICA) under Arvind Envisol with a view to collaborating for potential expertise sharing, enhancing students' exposure to industrial know-how and research projects in the field of water and wastewater technology.

MoU with Kanoria Chemical

An MoU was signed between Nirma University and Kanoria Chemicals and Industries Ltd. To evaluate the potential research relationship to boost the industry-academia association.

ICMPC-2024

The 16th International Conference on Materials Processing and Characterization (ICMPC) was organized by the Mechanical Engineering Department at the Institute of Technology, Nirma University, from June 27 to 29, 2024.

Dignitaries on the dias during inaugural function of ICMPC 2024

The conference aimed to bring together experts from academic institutions, industry, research institutes and professional engineers to share knowledge, expertise and experience in the emerging trends related to advanced manufacturing, materials processing and characterisation. The eminent speakers at the conference were from the United Kingdom and Singapore, as well as renowned Universities across India. More than 200 participants registered for the conference and presented research work. In a true sense, ICMPC 2024 was a multidisciplinary conference encompassing several Material Science and Mechanical Engineering themes and focused on Industry Applications.

Visit of CSIR- Central Glass & Ceramic Research Institute

The CSIR-Central Glass & Ceramic Research Institute team visited the Civil Engineering Department, Nirma University, on February 18, 2025 and toured our state-of-the-art departmental laboratories. Their visit provided a great opportunity to discuss advancements in materials science and explore potential research collaborations.
